Blasting Demolition Dismantling Remediation Disposal

Since 1938, we at Liesegang have specialised in the deconstruction and dismantling of industrial facilities.

Our decades of experience make us a competent and reliable partner to our customers. Our clientele is principally in large-scale industry and our core customers are primarily in the (petro) chemical and mining industries.

Our range of services includes:

- Demolition
- Industrial dismantling
- Breaking
- Blasting technology
- Remediation of hazardous substances
- Use of metal and steel scrap
- Waste disposal
- Steel construction
- Installations
- Engineering services

Meeting the stringent industrial safety and environmental protection requirements of our customers is a matter of course and represents everyday practice for all members of staff at Liesegang.

Our priorities include not only safety and environmental protection but also quality and the constant improvement of our services. This high standard makes us a reliable and competent partner, even for complex and involved measures.

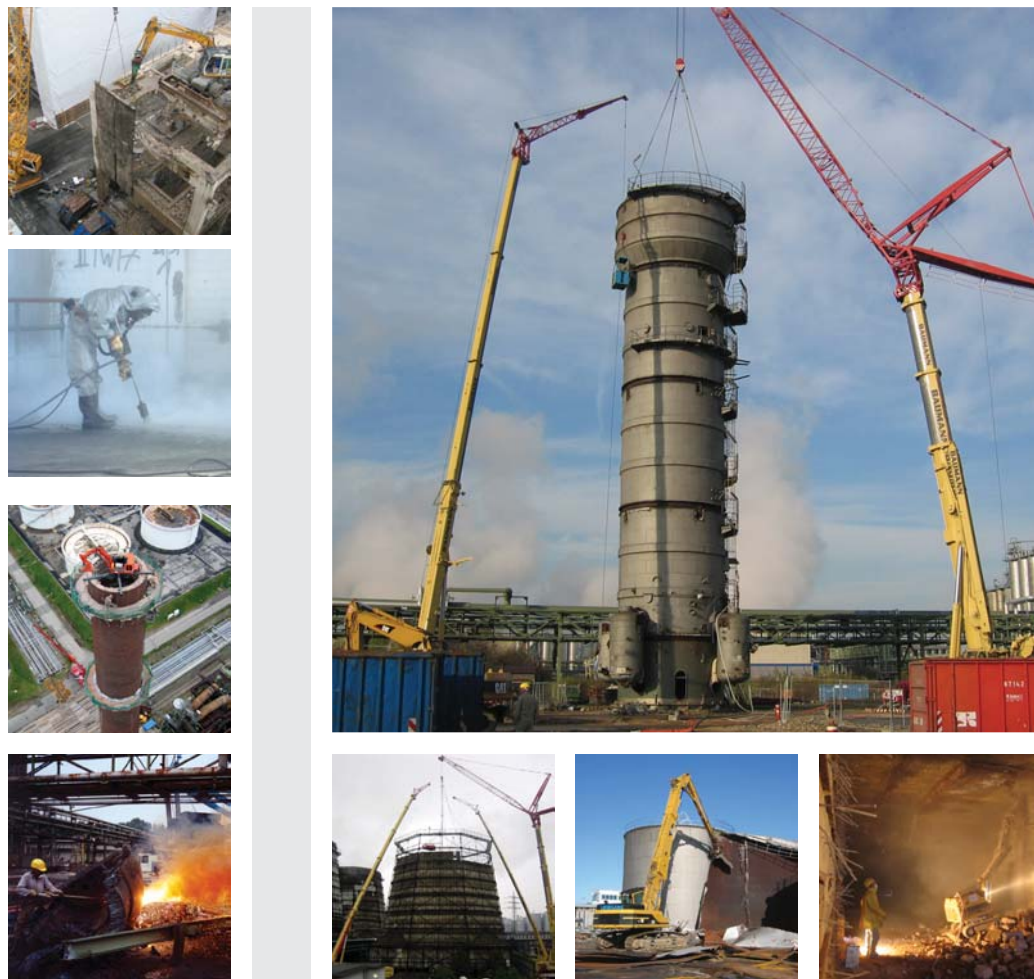

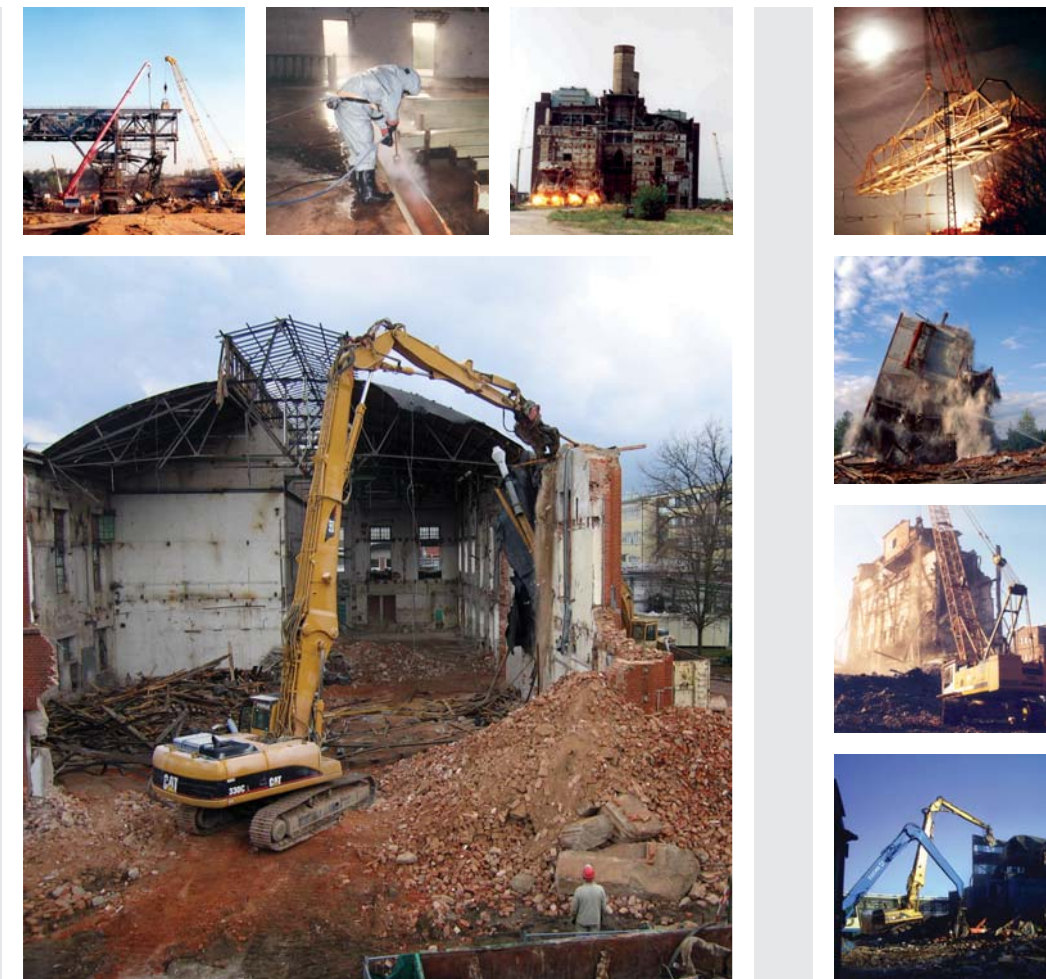

The daily and constantly changing problems of the various projects make our operation and thinking both flexible and innovative.

The extensive range of services and decades of experience frequently solve problems from our core customers.

MEMBER OF:

CERTIFIED IN ACCORDANCE WITH:

Who is Liesegang?

Richard Liesegang GmbH & Co. KG is a medium sized company with around 50 employees. Since 1938, it has also been active as a specialist company in the area of dismantling, demolition, and blasting technology. Today, our range of services includes the following service areas:

- Industrial demolition
- Industrial dismantling
- Breaking
- Use of steel and metal scrap
- Remediation of hazardous substances
- Blasting technology
- Waste disposal
- Engineering services

The total turnover in the last three complete financial years comes to around 30 m Euro. Of this, approx. 20 m Euro are accounted for in the area of demolition / dismantling / breaking and approx. 5 m Euro in the area of remediation of hazardous substances (asbestos, dioxin, PCB, radioactive mercury, heavy metals etc).

Our clientele is principally in large-scale industry and the following companies, for example, are among our core customers:

- Agfa-Gevaert
- Akzo Nobel
- Bayer
- Boehringer
- Clariant
- Evonik Degussa
- Deutsche BP
- Deutz
- E.ON Energie
- Exxon Mobil
- GSB
- Henkel
- InfraServ Hoechst
- Kronos Titan
- Linde
- LyondellBasell
- Rheinenergie
- RWE Power
- Shell Deutschland
- Total Deutschland
- Wacker Chemie

Approx. 70 % of total turnover comes from our core customers. Orders from the public sector and the building industry respectively generate around 10 % of turnover. Other customer groups account for the remaining 10 %.

A large technical equipment facility, well-trained and experienced staff, and the decades of experience of our engineers allow us to provide you with problem solutions that are both economic and efficient.

What are the facilities of Liesegang?

In particular, our own technical equipment facilities include:

- Mobile excavators (15–24 t) x4
- Crawler excavators (35–72 t) x7, of which 2 long front 24–28 m
- Cable excavators (80 t) up to 65 m frame height,
each with various add-on parts (hammers, forceps, cutters, grabbers, pulverisers)
- Wheel loaders (27–61 kW) x6
- Crushers (chain mobile) x2
- Lorries (tankers, container trucks etc.)
- Various remediation equipment (high pressure pumps, negative pressure devices, filtration plants etc.)
- Various special equipment (demolition robots, splitting device, drilling rig etc.)
- Various special tools (air tools, rail screwing devices, floor cutters, site fencing etc.)
- Building site facilities (office, staff, material containers, site fencing etc.)

What does LieseGang have that others do not?

Certifications:

- Specialist company under German regulations WHG (Water Resources Act) §19 and GefStoffV (Ordinance on Hazardous Substances) §39
- Authorised business under German regulations TRGS (Technical Rule for Hazardous Substances) 519 and SprengG (Explosive Substances Act)
- SCC**/ SGU – certification
- QM: DIN EN ISO 9001 ff:2000
- EfBV certification (waste disposal specialist)
- RAL quality mark for demolition, quality class HA 3, AB, AK

Experience with remediation of hazardous substances:

- Professional skilled staff in accordance with German standards BGR 128, TRGS 519, TRGS 521, TRGS 524
- Dioxins and furans
- Mercury, radioactive
- Chlorine compounds
- Heavy metals
- Acids
- Asbestos

Blasting technology:

We have six blasting masters of our own, with special experience in the areas of:

- Building deconstruction
- Blasting of hot masses
- Steel blasting using blast cutting charges
- Special blasting for cleaning production plants
- Agricultural and forestry blasting

Industrial dismantling:

We have extensive experience in the dismantling of industrial installations and individual components such as containers, apparatus, machines and pipelines. This is frequently carried out during ongoing operation, sometimes as purely cold dismantling, with no tools and machines that generate sparks, inside EX areas. Dismantling for reuse is also no problem for us.

Industrial safety:

Decades of working in the (petro)chemical industry with the corresponding safety requirements of such businesses goes hand in hand with the very high level of safety technical training and experience of our staff. We have two safety experts and two safety officers. Our tools and equipment are subject to strict testing intervals. The ongoing training of our staff is ensured with a detailed training plan.

Memberships:

- Deutscher Abbruchverband e.V., Düsseldorf
- Deutscher Sprengverband e.V., Siegen
- RAL Gütegemeinschaft Abbruch e.V., Düsseldorf
